Ph: (804) 828-4246
Fx: (804) 828-9100

This practice-based program addresses the following professional competencies (learning objectives):

1. Describe the pathophysiology, including predisposing factors, and presenting signs and symptoms of thrombotic disorders.
2. Design, recommend, monitor, and evaluate patient specific anticoagulant regimens that incorporate the principles of evidence-based medicine.
3. Identify appropriate goals and outcomes of pharmacologic treatments of selected thrombotic conditions, common adverse effects, common drug interactions, and impact of diet on patient outcomes.
4. Use effective oral and written communication skills to communicate with patients, caregivers, and other health care professionals regarding safe and optimal anticoagulation therapy.
